

Appl. No. 10/531,191
Amdt. dated October 1, 2008
Response to Advisory Action of September 24, 2008

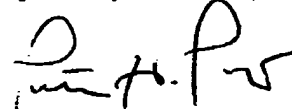

Interview Summary

The Examiner was called to seek clarification upon receipt of the Advisory Action mailed September 24, 2008. More particularly, it was pointed out by the undersigned that the first Official Action mailed September 9, 2007 had indicated that with respect "to the above listed phosphate compounds" the claims appeared allowable so that new issues should not be raised by the claims as amended. It was agreed that subject to an updating search and the correction of the noted dependency issues, the claims would be allowable. Dependent claims 4 and 5 are hereby amended so they do not depend from canceled claims.

Conclusion

It is believed that all of the claims are in condition for allowance, which action is respectfully requested.

Respectfully submitted,

Peter H. Priest
